

Valve Wrenches

- ▶ For convenient wrench-tightening of fittings on high pressure rotary shear valves
- ▶ For removal of knobs on Upchurch Scientific® Manual Valves

The smartly designed IDEX Wrench is a double-ended slotted socket wrench that fits over 1/16" and 1/8" OD tubing. It easily loosens and tightens 1/4" and 5/16" hex head stainless steel or PEEK fittings. The "Z" shape of the IDEX Wrench provides ideal leverage for changing sample loops and fittings, and keeps one end from restricting the use of the other.

The V-103 is an Allen (hex-key) wrench designed to remove the knob from Upchurch Scientific V-101 valves (page 133). The V-104 is an Allen wrench that can be used to remove the knob from Upchurch Scientific Medium Pressure Selection and Injection Valves (also found on page 133).

Mounting Brackets

Rheodyne® mounting brackets and panels of different shapes and sizes organize and provide a sturdy support for Rheodyne valves. The Ring Stand Mounting Bracket now allows the valves to mount onto common laboratory equipment.
