

FACT SHEET

AC4000S Ductless Fume Hood

AirClean® Systems 50" Ductless Polypropylene Fume Hood with AirSafe™ automatic safety controller and vapor-proof fluorescent light. Complete with vertical sliding safety glass sash and integral spill base. Hood requires three (3) like filters for operation, filter stacking available for complex applications.

Key Features:

- All polypropylene seamless construction prevents harsh chemicals from attacking the product and eliminates the potential for RUST!
- AirSafe™ automatic safety controller provides constant monitoring of face velocity and filter life — REAL TIME!
- AirZone™ internal baffle provides even airflow for superior containment of toxic fumes and vapors.
- Integral polypropylene spill base - thermally fused.
- Large filter capacity to ensure adequate residence time for chemical fume and vapor capture. Bonded Carbon filter capacity of 150 pounds.
- Fixture and service fittings available
- Full access hood allows free range of motion by operator. Minimal to no installation required — can be moved easily and economically.
- Available in 110V AC or 220V AC versions.

Polypropylene hoods are built to withstand the harshest applications. They are built to last!

AirSafe™ Automatic Safety Controller

- Constant airflow and filter monitoring
- Audible and visible alarms
- Variable airflow volume control

Bonded Carbon Filter

- Solid matrix provides a predictable mass to determine filter life.
- Bonded carbon eliminates the need for a safety HEPA filter — NO CARBON DUST!
