DHR

Refractometer

Model	DHR-FR1
--------------	----------------

Measuring range	0 - 85% Bx
-----------------	------------

Resolution	0.01% Bx
------------	----------

Temperature compensation	10 - 75°C
--------------------------	-----------

Modell	DHR-60 B1
---------------	------------------

Measuring range	0 - 60% Bx
-----------------	------------

Resolution	0.1% Brix
------------	-----------

Temperature compensation	10 - 75°C
--------------------------	-----------

Digital hand held refractometer for directly display the measured values in terms of dry matter.

- Measurement of liquid media from low to high viscosity
- Handy design, simple operation, it can measure samples up to 100°C
- Protection class IP65, dimensions 45 x 32 x 153 mm, weight appr. 100g

Several other models available:

- DHR-85 B1 (45 - 85% Bx)
- Honey DHR-H1 (13 - 25% water in honey)
- Coffee DCR-C1 (10 - 20%)

Typical applications of the model

- Chemical industry
- Pharmaceutical industry
- Petrochemical industry
- Cosmetics
